

solarize southwest

Would you like to save money while saving energy? Join your neighbors and bring the power of solar into your home. Be a part of Oregon's energy solution!

Solarize Southwest is a volunteer-driven community effort in partnership with the Southwest Neighborhoods, Inc. (SWNI) designed to bring solar electricity and the benefits of weatherization to Southwest Portland homes. Interested neighbors will come together to enjoy significant savings through the bulk purchase of solar electric panels.

This project will also connect residents with resources to make their homes more energy efficient. Residents may choose to participate in the solar option, the weatherization option or both.

If you have been thinking of installing a solar electric system on your home but aren't sure who to hire, what to buy, where to start or how to get the best price possible, we can help! We'll tackle the process as a team while realizing great cost savings through the power of bulk purchasing. Also interested in weatherizing your home? Contact Solarize Southwest, and we'll show you how.
